Structural Dynamics and Static Nonlinear Analysis From Theory to Application Belgasmia, Mourad,2021-01-29 Static analysis is a special case of dynamic analysis The main reason for using static or pseudo static analysis is the simplicity of the design and the analysis itself Many structures such as buildings bridges dams ships airplanes and more are studied by a dynamic analysis which is a more complicated and time consuming analysis compared to a static one such structures studied in this way are safer and their behavior is closer to reality Thanks to the important evolution of computer science numerical methods and mathematical models we are boldly confronting the analysis of the most complex structures with huge dimensions all this in a few hours in order to have an exact behavior of these structures closer to reality through the use of static dynamics and analysis

Structural Dynamics and Static Nonlinear Analysis From Theory to Application is concerned with the challenging subject of structural dynamics and the hydrodynamic principle as well as nonlinear static methods of analysis for seismic design of structures The chapters are arranged into three parts The first deals with single degree of freedom DOF systems The second part concerns systems with multiple degrees of freedom DOF with which one can create analytical and mathematical models of the most complex structures passing through the hydrodynamic principle with an application in real cases The last part sheds light on the principle of nonlinear static methods and its application in a real case This book is ideal for academics researchers practicing structural engineers and research students in the fields of civil and or mechanical engineering along with practitioners interested in structural dynamics static dynamics and analysis and real life applications

Structural Dynamics of Earthquake Engineering S Rajasekaran,2009-05-30 Given the risk of earthquakes in many countries knowing how structural dynamics can be applied to earthquake engineering of structures both in theory and practice is a vital aspect of improving

the safety of buildings and structures It can also reduce the number of deaths and injuries and the amount of property damage The book begins by discussing free vibration of single degree of freedom SDOF systems both damped and undamped and forced vibration harmonic force of SDOF systems Response to periodic dynamic loadings and impulse loads are also discussed as are two degrees of freedom linear system response methods and free vibration of multiple degrees of freedom Further chapters cover time history response by natural mode superposition numerical solution methods for natural frequencies and mode shapes and differential quadrature transformation and Finite Element methods for vibration problems Other topics such as earthquake ground motion response spectra and earthquake analysis of linear systems are discussed Structural dynamics of earthquake engineering theory and application using Mathematica and Matlab provides civil and structural engineers and students with an understanding of the dynamic response of structures to earthquakes and the common analysis techniques employed to evaluate these responses Worked examples in Mathematica and Matlab are given Explains the dynamic response of structures to earthquakes including periodic dynamic loadings and impulse loads Examines common analysis techniques such as natural mode superposition the finite element method and numerical solutions Investigates this important topic in terms of both theory and practise with the inclusion of practical exercise and diagrams

Smart Connection Systems Jong Wan Hu,2015-10-05 This book introduces new smart connection systems which can be used in aseismic building design in order to control inter story drifts and to reduce residual displacements They are also utilized as damper devices and base isolators The application of these systems to composite moment frame buildings will also be treated in the book In addition Materials Science and Information Technology Cai Suo Zhang,2012-01-03 Selected
