Inventing the Future Nick Srnicek, Alex Williams, 2015-11-17 This major new manifesto offers a clear and compelling vision of a postcapitalist society and shows how left wing politics can be rebuilt for the 21st century Mark Fisher author of Capitalist Realism Neoliberalism isn't working Austerity is forcing millions into poverty and many more into precarious work while the left remains trapped in stagnant political practices that offer no respite *Inventing the Future* is a bold new manifesto for life after capitalism Against the confused understanding of our high tech world by both the right and the left this book claims that the emancipatory and future oriented possibilities of our society can be reclaimed Instead of running from a complex future Nick Srnicek and Alex Williams demand a postcapitalist economy capable of advancing standards liberating humanity from work and developing technologies that expand our freedoms This new edition includes a new chapter where they respond to their various critics **Routledge Handbook of Radical Politics** Ruth Kinna, Uri

Gordon, 2019-05-16 Successive waves of global protest since 1999 have encouraged leading contemporary political theorists to argue that politics has fundamentally changed in the last twenty years with a new type of politics gaining momentum over elite representative institutions The new politics is frequently described as radical but what does radicalism mean for the conduct of politics Capturing the innovative practices of contemporary radicals *Routledge Handbook of Radical Politics* brings together leading academics and campaigners to answer these questions and explore radicalism's meaning to their practice In the thirty five chapters written for this collection they collectively develop a picture of radicalism by investigating the intersections of activism and contemporary political theory Across their experiences the authors articulate radicalism's critical politics and discuss how diverse movements support and sustain each other Together they provide a wide ranging account of the tensions overlaps and promise of radical politics while utilising scholarly literatures on grassroots populism to present a novel analysis of the relationship between radicalism and populism *Routledge Handbook of Radical Politics* serves as a key reference for students and scholars interested in the politics and ideas of contemporary activist movements

Utopia Beyond Capitalism in Contemporary Literature Raphael Kabo, 2023-06-15 Featuring readings of contemporary utopian poetry and fiction from authors such as Juliana Spahr Mohsin Hamid Bong Joon ho Kim Stanley Robinson Lidia Yukavitch and Cory Doctorow this book investigates the commons a form of organisation based on collectivity communalism and sharing as a type of transition between capitalist precarity and crisis and anti capitalist futures Each of the texts under examination was written in opposition to a particular crisis of the capitalist present inequality political representation mobility and climate change and develops a particular mode of utopian commoning Through its examination of these writers crises and texts this book reaffirms the use of utopianism as a tool for generating and representing alternative futures for a world in the midst of ongoing planetary crisis *The Fault in Our SARS* Rob Wallace, 2023-02-02 Proposes the pragmatic changes we must make to survive COVID and the worst of the new diseases on the horizon The Trump administration's

neglect and incompetence helped put half a million Americans in the ground dead from COVID 19 Joe Biden was elected president in part on the promise of setting us on a science driven course correction but a little more than a year later another half a million Americans were killed by the virus What happened In The Fault in Our SARS evolutionary epidemiologist Rob Wallace catalogs the Biden administration s failures in controlling the outbreak He also shows that beyond matters of specific political persona or party it was a decades long structural decline associated with putting profits ahead of people that gutted U S public health COVID 19 isn t just an American tragedy Each in its own way countries around the world following the profit first model failed their people Global vaccination campaigns were bottled up by efforts to protect pharmaceutical companies intellectual property rights Economies were treated as somehow more real than the people and ecologies upon which they depend Frustrated populations pushed back against lockdowns abuses of governmental trust and fair or not the very concept of public health A social rot meanwhile wended its way into the heart of the sciences that tasked with controlling disease serve the systems that helped bring about COVID 19 in the first place In The Fault in Our SARS Wallace and an array of invited contributors aim to strip down the capitalist social psychology that in effect protected the SARS virus The team proposes instead new approaches in health and ecology that appeal both to humanity s highest ideals and the pragmatic changes we must make to survive COVID and the worst of the new diseases on the horizon **Natural**

Catastrophe Brian Elliott,2016-10-26 Brian Elliott persuasively argues that climate change is not a natural phenomenon but a political phenomenon a symptom of neoliberal governance This helps us to understand how across wealthy liberal democracies environmental concern has increasingly been framed as a consumer responsibility issue rather than as a matter of structural social political transformation Thinking of a world truly beyond climate change requires us to reimagine the state beyond its current neoliberal configuration Elliott argues that in order to achieve this environmental politics in the west needs to renew the Marxist challenge to the global market s benign production of social utility and construct a new non apocalyptic politics of nature Everyday Automation Sarah Pink,Martin Berg,Deborah Lupton,Minna

Ruckenstein,2022-05-09 This Open Access book brings the experiences of automation as part of quotidian life into focus It asks how where and when automated technologies and systems are emerging in everyday life across different global regions What are their likely impacts in the present and future How do engineers policy makers industry stakeholders and designers envisage artificial intelligence AI and automated decision making ADM as solutions to individual and societal problems How do these future visions compare with the everyday realities power relations and social inequalities in which AI and ADM are experienced What do people know about automation and what are their experiences of engaging with actually existing AI and ADM technologies An international team of leading scholars bring together research developed across anthropology sociology media and communication studies and ethnology which shows how by rehumanising automation we can gain deeper understandings of its societal impacts The Open Access version of this book available at <http://www.taylorfrancis.com>
