Famine Conflict And Response A Basic Guide:

Famine, Conflict, and Response Frederick C. Cuny, Richard B. Hill, 1999 A practical guide to underlying causes and immediate lasting solutions for famine Explains efficient use of resources in a crisis Written by a well known disaster relief practitioner and humanitarian Fred Cuny adopts an economic approach to wartime famine that is still considered innovative and challenging by field experts His international fieldwork in both natural and man made disasters is visionary and his approach to famine pragmatic This book focuses on counter famine measures revolving around people s livelihoods giving humanitarian relief workers a more permanent solution to world hunger

The New Famines Stephen Devereux, 2006-11-22 The recent occurrences of famine in Ethiopia and Southern Africa have propelled this key issue back into the public arena for the first time since 1984 as once again it becomes a priority not only for lesser developed countries but also for the international community Exploring the paradox that is the persistence of famine in the contemporary world this book looks at the way the nature of famine is changing in the face of globalization and shifting geo political forces The book challenges perceived wisdom about the causes of famine and analyzes the worst cases of recent years including close analysis of food scarcity in North Korea Ethiopia Sudan and Malawi and less well known cases in Madagascar Iraq and Bosnia With fresh conceptual frameworks and analytical tools major theoretical constructs which have previously been applied to analyze famines such as the democracy ends famine argument Sen s entitlement approach and the complex political emergency framework are confronted This volume assembles an international team of contributors including Marcus Noland Alex de Waal and Dan Maxwell an impressive roster which helps make this book an important resource for those in the fields of development studies and political economics

Research Handbook on Climate Change, Migration and the Law Benoît Maye, François Crépeau, 2017-10-27 This comprehensive Research Handbook provides an overview of the debates on how the law does and could relate to migration exacerbated by climate change It contains conceptual chapters on the relationship between climate change migration and the law as well as doctrinal and prospective discussions regarding legal developments in different domestic contexts and in international governance

Disaster and Human History Benjamin Reilly, 2022-05-13 Human history is periodically punctuated by natural disasters from Vesuvius eruption to the modern day Covid 19 pandemic Volcanoes have buried entire cities earthquakes have reduced structures to smoldering ruins Floods and cyclones have wreaked havoc on river valleys and coastlines and desertification and climate change have weakened society s underpinnings Death tolls are often escalated by starvation and illness which frequently occur in tandem This second edition assesses natural disasters on human society and the effect of strategies developed to reduce their impact This book addresses the interconnectivity of disaster and human responsibility through 23 updated case studies including a new chapter on the 2011 T hoku tsunami and the ensuing Fukushima nuclear disaster

Famine Early Warning Systems and Remote Sensing Data Molly E. Brown, 2008-05-06 This book describes the interdisciplinary work of USAID s Famine Early

Warning System Network FEWS NET and its influence on how food security crises are identified, documented and the kind of responses that result. The book describes FEWS NET's systems and methods for using satellite remote sensing to identify and describe how biophysical hazards impact the lives and livelihoods of the population where they occur. It presents several illustrative case studies that will demonstrate the integration of both physical and social science disciplines in its work. FEWS NET's operational needs have driven science in biophysical remote sensing applications through its collaboration with the US Geological Survey, the National Aeronautics and Space Administration, National Oceanographic and Atmospheric Administration and US Department of Agriculture as well as methodologies in the social science domain through its support of the US Agency for International Development, UN World Food Program and numerous international non-governmental organizations such as Save the Children, Oxfam and others. Because FEWS NET is an organization that must provide a global picture of food insecurity to decision makers, the information it relies on are by necessity servable and able to be documented. Thus many aspects of traditional livelihood analysis, for example, cannot be used by FEWS NET as they rely upon relationships and ways of expressing power and knowledge at the local scale that cannot be easily scaled up to express variations in access to food at a community level.

Protection Hugo Slim, Andrew Bonwick, 2006. This guide gives essential advice and insights to humanitarian practitioners who are involved in providing safety and protecting vulnerable people in war and disaster. It provides a framework for responsibility and action which helps clarify conceptual issues and helps humanitarian field workers position themselves vis-à-vis other actors who have overlapping mandates. A practical schema is also presented that gives practical advice on how to think through the various elements of protection-focused programming in four clear steps: assessment, program design, implementation and monitoring and evaluation. The guide also outlines key principles of best practice for protection-focused humanitarian work.

Street Entrepreneurs John Cross, Alfonso Morales, 2007-06-11. Addressing the current dearth of available literature on this topic, the editors use a range of international case studies to explore street vending and informal economies which continue to be especially vital economic drivers in developing countries. This volume collects essays from authors around the world about the markets and vendors they know best, including studies of USA, China, Mexico, Turkey. The contributors speak of the struggles that vendors have faced to legitimize their activity, the role that they play in helping societies adapt to and survive catastrophes as well as the practical roles that they play in both the local and global social and economic system. As well as highlighting the importance of street markets as a phenomenon of interest in itself to a growing body of scholarship, this study demonstrates how an analysis of street vending can provide insights not only into economic anthropology but also urban studies, post-modernism, spatial geography, political sociology and globalization theory.

The Great North Korean Famine Andrew S. Natsios, 2001. An administrator of the US Agency for International Development with first-hand experience of conditions and events, Natsios provides a provocative analysis of the 1995-99 disaster. He focuses on its political elements, both the North Korean policies that exacerbated the

problems and the politics that prevented governments and NGOs from acting quickly
