Ethics Design And Planning Of The Built Environment Urban And Landscape Perspectives

Patrick Abercrombie

Ethics Design And Planning Of The Built Environment Urban And Landscape Perspectives:

Ethics, Design and Planning of the Built Environment Claudia Basta, Stefano Moroni, 2013-06-24 The book proposes a set of original contributions in research areas shared by planning theory architectural research design and ethical inquiry The contributors gathered in 2010 at the Ethics of the Built Environment seminar organized by the editors at Delft University of Technology Both prominent and emerging scholars presented their researches in the areas of aesthetics technological risks planning theory and architecture The scope of the seminar was highlighting shared lines of ethical inquiry among the themes discussed in order to identify perspectives of innovative interdisciplinary research After the seminar all seminar participants have elaborated their proposed contributions Some of the most prominent international authors in the field were subsequently invited to join in with this inquiry Claudia Basta teaches Network Infrastructures and Mobility at Wageningen University Between 2009 and 2011 she worked as Coordinator of the 3TU Centre of Excellence for Ethics and Technology of Delft University where she completed her post doc research on the shared areas of investigation between risk theories planning theories and ethical inquiry Her main research interests concern the matter of assessing and governing technological risks in relation to sustainable land use planning She wrote a number of journal articles and contributions to collective books on these themes Stefano Moroni teaches Land use ethics and the law at Milan Politecnico His main research interests concern planning theory and ethics He is the author of a number of books and journal articles Recent publications as co author Contractual Communities in the Self Organizing City Springer 2012

Ethical Cities Brendan F.D. Barrett, Ralph Horne, John Fien, 2020-12-06 Combining elements of sustainable and resilient cities agendas together with those from social justice studies and incorporating concerns about good governance transparency and accountability the book presents a coherent conceptual framework for the ethical city in which to embed existing and new activities within cities so as to guide local action The authors observations are derived from city specific surveys and urban case studies These reveal how progressive cities are promoting a diverse range of ethically informed approaches to urbanism such as community wealth building basic income initiatives participatory budgeting and citizen assemblies The text argues that the ethical city is a logical next step for critical urbanism in the era of late capitalism characterised by divisive politics burgeoning inequality widespread technology induced disruptions to every aspect of modern life and existential threats posed by climate change sustainability imperatives and pandemics Engaging with their communities in meaningful ways and promoting positive transformative change ethical cities are well placed to deliver liveable and sustainable places for all rather than only for wealthy elites Likewise the aftermath of shocks such as the 2008 Global Financial Crisis and the Covid 19 pandemic reveals that cities that are not purposeful in addressing inequalities social problems unsustainability and corruption face deepening difficulties Readers from across physical and social sciences humanities and arts as well as across policy business and civil society will find that the application of ethical principles is key to the pursuit of socially inclusive urban futures and the

potential for cities and their communities to emerge from or at least ameliorate a diverse range of local national and global challenges

Rewilding Nathalie Pettorelli, Sarah M. Durant, Johan T. du Toit, 2019-01-31 Through a global and interdisciplinary lens this book discusses analyzes and summarizes the novel conservation approach of rewilding The volume introduces key rewilding definitions and initiatives highlighting their similarities and differences It reviews matches and mismatches between the current state of ecological knowledge and the stated aims of rewilding projects and discusses the role of human action in rewilding initiatives Collating current scholarship the book also considers the merits and dangers of rewilding approaches as well as the economic and socio political realities of using rewilding as a conservation tool Its interdisciplinary nature will appeal to a broad range of readers from primary ecologists and conservation biologists to land managers policy makers and conservation practitioners in NGOs and government departments Written for a scientifically literate readership of academics researchers students and managers the book also acts as a key resource for advanced undergraduate and graduate courses

Systemic Design Peter Jones, Kyoichi Kijima, 2019-01-23 This book presents emerging work in the co evolving fields of design led systemics referred to as systemic design to distinguish it from the engineering and hard science epistemologies of system design or systems engineering There are significant societal forces and organizational demands impelling the requirement for better means of change through integrated design practices of systems and services Here we call on advanced design to lead programs of strategic scale and higher complexity e g social policy healthcare education urbanization while adapting systems thinking methods creatively pushing the boundaries beyond the popular modes of systems dynamics and soft systems Systemic design is distinguished by its scale social complexity and integration it is concerned with higher order systems that entail multiple subsystems By integrating systems thinking and its methods systemic design brings human centred design to complex multi stakeholder service systems As designers engage with ever more complex problem areas it is necessary to draw on a basis other than individual creativity and contemporary design thinking methods Systems theories can co evolve with a new school of design theory to resolve informed action on today s highly resilient complex problems and can deal effectively with demanding contested and high stakes challenges

Bibliography of Landscape Architecture, Environmental Design, and Planning Antoinette Paris Powell, 1987

Ethics and Urban Design Gideon S. Golany, 1995-08-01 The city according to urban design scholar Gideon Golany is the largest and most complicated project ever produced by humankind In *Ethics and Urban Design* he challenges design professionals to reexamine their basic assumptions about the urban environment and offers design strategies based on enduring human values In search of answers to the paradoxical problems of the modern city Golany takes the reader through the sweep of human settlements from the dawn of civilization to the present His authoritative examination of the genesis of the city is illuminated by instructive examples of early urban centers Mesopotamia the Indus River Valley the Egyptian cities of the Nile and the capital cities of ancient China all are examined in the light of what made them work as major centers of

human activity What Golany finds in the success stories of the past are cohesive sociocultural values that shaped the design of homes neighborhoods and cities These ethical values helped to maintain an equilibrium within the society that permeated its natural social and human made environments In the present era conversely he finds a major disconnection between human values and the ethics of technology which has resulted in confusion imbalance and dehumanization To help designers gain a perspective on possible solutions Golany explains leading comprehensive design strategies including the valley theory the urban border zone concept and the regional concept of Patrick Geddes In the case study of contemporary Holland he details what a small densely populated country has been able to achieve through design planning rooted in environmental ethics

Future Frontiers for Urban Design the culminating section of this groundbreaking book opens with Golany's vision of the future city He examines the issues of thermal performance and climate as they relate to urban design and offers the concept of geospace the earth enveloped habitat Buttressing his presentation with detailed information on the mechanics of geospace Golany describes case studies of the successful use of earth enveloped habitats in China and Tunisia He makes a powerful argument for the geospace city as a renewal of ancient traditions that can restore the vital equilibrium between nature and human settlements that we seem to have lost

Ethics and Urban Design is a distinguished scholar's analysis and prescription for the city it offers an abundance of stimulating ideas for the architects designers and planners who have assumed responsibility for its future *Ethics Urban Design* draws on historical examples and contemporary case studies from around the world to illustrate urban design strategies that can help restore equilibrium to the natural social and built environments of the city In this stimulating book urban design scholar Gideon Golany offers architects designers and planners both an in depth analysis of the fundamental issues of urban design and practical options for the design of the future city

Examines the genesis and development of the city from the earliest settlements to the rise of urban society Presents urban design strategies based on historical examples of early urban centers including Mesopotamia the Indus River Valley Egypt and China Offers case studies of environmental success stories from Europe Asia and Africa Details geospace design options the use of underground space for diversified land use housing and transportation Fully illustrated with over 80 photographs drawings and diagrams
