 Saigo,1998-06 This book is intended for use in a one or two semester course in environmental science human ecology or
 environmental studies at the college or advanced placement high school level Because most students who will use this book
 are freshman or sophomore nonscience majors the authors have tried to make the text readable and accessible without
 technical jargon or a presumption of prior science background At the same time enough data and depth are presented to
 make this book suitable for many upper division classes and a valuable resource for students who will keep it in their
 personal libraries after their formal studies are completed The goal of this book is to provide an up to date introductory view
 of essential themes in environmental science along with emphasis on details and case studies that will help students process
 and retain the general principles **ENC Focus** ,2000 **Environment, Third Edition with the 2001 World**

 designed to be used in introductory courses on environmental science It treats environmental science as an
 INTERDISCIPLINARY study combining ideas and information from natural sciences such as biology chemistry and geology
 and social sciences such as economics politics and ethics to present a general idea of how nature works and how things are
 interconnected It examines how the environment is being used and abused and what individuals can do to protect and
 improve it for themselves for future generations and for other living things
