Good Sport Thomas H. Murray, 2017-12-01 Why are fiberglass vaulting poles and hinged skates accepted in sport while performance enhancing drugs are forbidden Are the rules that forbid them arbitrary Should we level the playing field by allowing all competitors to use drugs that allow them to run faster or longer leap higher or lift more In this provocative exploration of what draws us to sport as participants and spectators Thomas Murray argues that the values and meanings embedded within our games provide the guidance we need

to make difficult decisions about fairness and performance enhancing technologies Good Sport reveals what we really care about in sport and how the reckless use of biomedical enhancements undermines those values Implicit in sports history rules and practices are values that provide a sturdy foundation for an ethics of sport that celebrates natural talents and dedication You see these values when the Paralympics creates multiple level playing fields among athletes with different kinds of impairments They appear again in sports struggles to be fair to all when an extraordinary woman athlete emerges who appears to possess a mans hormone profile and muscles They are threatened when the effort to assure athletes a fair chance to win without doping is subverted by cheating or by corruption as in the case of Russias state supported doping operation Performance enhancing drugs distort the connection between natural talents the dedication to perfect those talents and success in sport Explaining the fundamental role of values and meanings Good Sport reveals not just what we champion in the athletic arena but also more broadly what we value in human achievement *Dying to Win* Barrie Houlihan,2002-01-01 Drug abuse in sport has now become an acute international problem which undermines the integrity of sport and is a real danger to the health of thousands of athletes The second edition of this publication has been updated to take account of new forms of drug abuse in the sports world as well as developments in genetic engineering and gene therapy It also contains a list of useful internet sources A key finding is that the control of doping including the harmonisation of both practice and policy among the major world sports bodies requires a re evaluation of the direction of future anti doping policy particularly in the light of the recent establishment of the World Anti Doping Agency **Sport, Health and Drugs** , Sports Medicine, Performance Enhancement and Doping Ivan Waddington,Christophe Brissonneau,2025-06-02 Tracing the history of sports medicine from the ancient world through to the present day this book shines new light on the embedded relationship between physicians performance enhancement and doping in elite sport Combining historical and sociological analysis the book shows how sports medicine as it developed in the late nineteenth and twentieth centuries became increasingly disengaged from its origins in preventive medicine to become closely linked with elite level competitive sport The book demonstrates how this link between sports medicine and elite competitive sport drew sports physicians into the search for enhanced performance so that by the second half of the twentieth century performance enhancement had become an essential raison d tre of sports medicine practitioners It examines how this search for enhanced performance has often led sports physicians to play a prominent role in the development and provision of performance enhancing drugs and looks in depth at the case study of France and professional cycling scene of some of the most high profile and consequential doping cases of all time This book is fascinating reading for anybody with an interest in sport history the history of medicine medical ethics the ethics of sport sport and society or science and society **Doping in Sport and Fitness** April Henning,Jesper Andreasson,2022-12-12 Doping in Sport and Fitness argues that rigid differentiations between doping contexts are less clear than it might seem Breaking down these boundaries allows for a more complete understanding of substance use patterns

behaviours and policy responses related to sport fitness and society
