## **Earthquake Terror Teaching Guide:**

**Teaching in Troubled Times** Kathy Paterson, 2010 This topical book begins with an appeal to teachers to remain positive in spite of what's happening outside the classroom and provides ideas to build confidence in addressing students' troubles. It offers valuable insights into dealing with any number of challenges from children's worries about the world to the parental tendency to overprotect to teachers' need to recharge in the midst of a stressful day. Practical and accessible, the book suggests simple ways of guiding honest and responsive discussion as well as liberating activities that encourage students to disengage from their fears. It addresses children's heavy exposure to violence and stereotypes especially through the media. It shows teachers how to explore major issues in the lives of their students in a healthy, positive way and how to encourage stronger, more aware, independent and successful learners. Publisher

**Becoming a Metacognitive Teacher** Roya Q. Scales, Thomas DeVere Wolsey, Seth A. Parsons, 2020 How can early and preservice teachers master the complex practice of teaching? This clearly written, research-based guide shows how to successfully navigate coursework, build relationships with mentors, and negotiate fieldwork and student teaching while developing metacognitive thinking skills. These are skills that allow teachers to continuously reflect on instructional practices and adapt them to fit their own teaching context and their students' diverse needs. Metacognitive teaching requires higher-level thought processes that for teachers include making connections among each segment of the teacher preparation program as well as deciding how these experiences directly and effectively apply to their classrooms. The authors argue that this kind of support is needed early in the journey of a teacher if they are to succeed and remain in the classroom. To foster metacognitive thinking among our students, teachers must have sophisticated metacognitive skills themselves. This unique and well-grounded text demonstrates the critical role of metacognition in developing the craft of effective teaching for preservice and novice teachers. William Brozo, professor of literacy, School of Education, George Mason University. Comprehensive and practical, this text provides an artful and thoughtful blend of strategies for prospective teachers' personal and professional development. The goal of developing thinking teachers who keep their students at the forefront is supported with the author's discussion of their and others' personal and research histories, rich vignettes, and access to multiple digital resources, e.g., TED talks, blogs, instructional videos. A text for both teacher educators and prospective teachers. Victoria J. Risko, professor emerita, Vanderbilt University.
