

# Origin of the Earth

The Earth probably formed from material in the solar nebula—the cloud of gas and dust that led to the formation of the Sun. This material gradually grew into a larger and larger body that became a molten ball of rock and metal. Later the rocky crust formed, its surface cooling enough to allow the continents to appear. Even later the oceans arrived, as well as the tiny organisms that released oxygen into the atmosphere. Although much of this gas was initially consumed in chemical reactions, over time, it allowed the development of multicellular organisms and an explosion of life that took place at the start of the Paleozoic Era, 542 million years ago.

## Continental Drift

This map shows the continents which are part of Gondwana which had split across the Earth's surface at the end of the Paleozoic period. The continents were split into Africa, South America, and Antarctica. The continents were split into Africa, South America, and Antarctica. Adopting an earth system approach throughout *Earth System History* shows students how Earth's ecosystem has developed over time and how events in the past provide a perspective for dealing with present and future changes. Clear and concise, the new Second Edition of this introduction to historical geology is perfect for one-term non-majors courses and contains lots of new content and improved visuals.

*Loose-leaf Version for Earth System History* Steven M. Stanley, John A. The structure of the Earth and its rocks, waters, and atmosphere is described. The Theme focuses on geological and evolutionary processes through the history of Earth's epochs and biomes since the Early Earth to the Quaternary. The unifying processes between the Earth's life and its rocks, waters, and atmosphere are global natural cycles of carbon, sulfur, and other elements that connect and influence the rate of geological processes, climate change, biological evolution, and human economy. These five volumes are aimed at the following five major target audiences: University and College students, Educators, Professional practitioners, Research personnel, and Policy analysts, managers, and decision makers, and NGOs.
